EXPERIENCE

TCS, Software Engineer **Apr 2025 – Present**

- Contributed to enterprise data management workflows for a client project based on **Reltio**, working on backend business logic and entity-matching systems.
- Identified and resolved a critical bug in the **IsPortal customer flag** during account merging in Reltio, which was causing merge failures across all customer accounts and impacting data integrity platform-wide.
- Implemented a **match-list enhancement** displaying dynamic similarity percentages across **5–6 entity fields** (name, address, phone, and others) in search results, improving record comparison accuracy and visibility.
- Contributed to building a **Rapp platform** integrated with **4 Reltio APIs** using Node.js and React.js, enhancing overall platform performance and operational workflows.

PROJECTS

AI Chat Platform | Next.js, TypeScript, MongoDB, Gemini API [Deployment - GitHub]

- Built a full-stack AI chat application with ***Google OAuth*** via NextAuth.js, MongoDB user persistence, and ***Nodemailer/SMTP*** email verification — deployed on Vercel.
- Integrated ***multi-model AI support*** (Gemini, OpenAI) via AI SDKs with a ***persistent memory system*** using mem0AI to retain conversation context across sessions, reducing repeated user inputs.
- Engineered ***multi-format file handling*** supporting images, text, CSV, and DOCX uploads via ***Cloudinary***, enabling AI interaction with 4 distinct content types.
- Implemented ***real-time streaming responses*** with markdown rendering and syntax highlighting, alongside chat management features including edit and delete message actions.

CodeBud – E-Learning Platform | React.js, Node.js, Express.js, MongoDB [Deployment - GitHub]

- Built a full-stack e-learning platform with ***dual-role architecture*** (Student/Instructor), supporting course creation, enrollment, and structured content management across both roles.
- Integrated ***Razorpay payment gateway*** handling end-to-end course purchases — including order creation, webhook-based payment verification, and transaction status tracking.
- Implemented ***JWT-based authentication and role-based authorization*** with OTP email verification, protecting routes and enforcing access control across both user roles.
- Built ***RESTful APIs*** using Node.js and Express.js with complete CRUD operations for users, courses, and enrollments, backed by MongoDB with structured data modeling.

TECHNICAL SKILLS

Programming Languages: C++, Python, JavaScript, TypeScript
Frontend: React.js, Next.js, TailwindCSS, Redux
Backend: Node.js, Express.js, REST APIs, JWT, NextAuth.js
Database: MongoDB, MySQL
AI & Integrations: Gemini API, OpenAI SDK, mem0AI, Cloudinary
DevOps & Tools: Docker, Git, GitHub, Vercel, Postman

ACHIEVEMENTS

- **ICPC ASIA WEST Regionalist -** Nov 2023 – Jan 2024 (Top global collegiate programming contest)
- **Ranked 509/41236 -** Leetcode Biweekly 175
- **GATE CSE -** Qualified 2024
- **LeetCode** (1848 - Knight)
- **Ranked 1255/26850 -** Leetcode Biweekly 171
- **CodeChef** (Rating 1650)

EDUCATION

B.Tech : Computer Science and Engineering (8.4 CPI) **2020 - 2024**
Shri Shankaracharya Technical Campus *Chhattisgarh, Bhilai*
