EXPERIENCE

TCS, Software Engineer **Apr 2025 – Present**

- Root-caused an **IsPortal customer flag** defect behind account-merge failures in ∼**5%** of merges; deployed the fix to **AWS Lambda**, with no recurrence since release, removing the manual repairs.
- Fixed a bidirectional bug in **Rapp** (React.js, Node.js) where creating a Bill-To/Ship-To (BTST) relationship A→B did not create B→A in Reltio, leaving ∼**30%** of customers' BTST relationships one-sided; reworked linking logic across **3 core files** so relationships sync to glprod for ERP ID assignment, cutting manual fixes from **10–15 to 2–3 per month**.
- Built an advanced search-and-match report comparing **5–6 entity fields** (UCM ID, name, address, ZIP, country, state), ranking accounts from most to least similar by **match percentage**; usage up ∼**15%** per team feedback.
- Fixed an address-sync defect in the **account-creation module** affecting ∼**10%** of accounts created via Rapp, and refactored it to remove repeated manual lookups and fixes.

PROJECTS

AI Chat Platform | Next.js, TypeScript, MongoDB, Gemini API, OpenAI [Deployment - GitHub]

- Built a full-stack AI chat application with **Google OAuth** (NextAuth.js), MongoDB user persistence and **Nodemailer/SMTP** email verification; deployed on Vercel.
- Integrated **multi-model support** (Gemini, OpenAI) through AI SDKs, with **persistent cross-session memory** using mem0 so conversations keep context.
- Added **file uploads** (images, text, CSV, DOCX) via **Cloudinary**, letting the model work with 4 content types.
- Implemented **real-time streaming responses** with markdown rendering and syntax highlighting, plus edit and delete for chat messages.

CodeBud – E-Learning Platform | React.js, Node.js, Express.js, MongoDB, Razorpay [Deployment - GitHub]

- Built a full-stack e-learning platform with **Student and Instructor roles**, covering course creation, enrollment and content management.
- Integrated **Razorpay** for course purchases: order creation, **webhook-based payment verification** and transaction status tracking.
- Implemented **JWT authentication** and **role-based authorization** with OTP email verification to protect routes and enforce access control.
- Built **REST APIs** (Node.js, Express.js) with full CRUD for users, courses and enrollments, backed by a structured MongoDB data model.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C++, Python, Java
Backend: Node.js, Express.js, REST APIs, JWT, OAuth (NextAuth.js)
Frontend: React.js, Next.js, Redux, TailwindCSS
Databases: MongoDB, MySQL
Cloud & DevOps: AWS (Lambda, S3, CLI), Docker, Git, GitHub, Vercel
AI & Integrations: Gemini API, OpenAI SDK, mem0, Cloudinary, Razorpay
Core: Data Structures & Algorithms, Postman

ACHIEVEMENTS

- **ICPC Asia West Regionalist** (Nov 2023 – Jan 2024), International Collegiate Programming Contest
- **LeetCode** max rating **1848**; ranked **509/41,236** (top 1.3%) in Biweekly Contest 175 and **1,255/26,850** (top 4.7%) in Biweekly Contest 171
- **CodeChef** rating 1650
- **GATE CSE** qualified (2024)

EDUCATION

B.Tech : Computer Science and Engineering (8.4 CPI) **2020 - 2024**
Shri Shankaracharya Technical Campus *Chhattisgarh, Bhilai*
